

MY Creativity Pitch-School Bullying.

The issue of bullying in schools has been a big problem for years now. It can lead to kid's academic performances to decrease, their mental health having to be messed up and even having to be physically harmed by peers. Even though I am just a 15 year old girl, using my skills I aim to solve this issue.

These are my skills and how they can help with the issue of bullying.

- 1. I can understand how others feel and create a safe space for them to share their experiences without judging.**
- 2. I can lead a team which is a skill I can use to develop anti-bullying activities, promoting a positive school environment.**
- 3. I can create visual materials like posters and infographics to raise awareness about bullying and promote kindness.**
- 4. I can communicate with students to ensure that they are informed and involved in bullying prevention efforts.**
- 5. I can help ensure that all students regardless of their language background have access to resources and support.**
